

## Unlocking the Mysteries: Science on the Edge of Our Solar System

## Mission Expert Research

### Student Activity Sheet

---

Mission Internet Home Page Address: \_\_\_\_\_

Draw a picture of the spacecraft for your mission. Label the parts of the craft and any instruments.

List the information and/or materials that the spacecraft is designed to collect.

---

---

---

---

---

---

---

---

Who are the people and the organizations that make this mission possible? List their names, job titles, and companies.

---

---

---

---

---

---

---

---

Describe at least one unique and interesting thing that you learned about your mission. Explain why you think it is unique or interesting.

Explain why your individual mission is important to the complete Discovery Program. What does it contribute to the program?

What questions do you still have about your mission that were not answered by your research?

As mission expert, why do you think society should support your mission? What does it contribute to people in general? Why should they pay for the mission?
